Godwin Pumps Distributor
Rental * Sales * Service

FEATURE FOR AUGUST 2007

5500 FEET BAUER PIPE

Pacific Pump and Power features the unique Bauer pipe and adapter quick disconnect coupling system on suction and discharge pipe. Fast and easy to use, a Bauer piping system can be set up in minutes while offering the flexibility of deflection at each joint up to 30°. Strong and durable yet lightweight, Bauer pipe is produced from high tensile strength abrasion resistant steel that is hot-dipped galvanized and is available in 3', 6', 10' and 20' lengths.

The Bauer Pipe and fittings provide several unique advantages:

- Simple and very fast coupling method. Latch two hooks and close the latching handle. No tools or loose parts.
- 30 degree range of articulation. Easy to layout pipes and couple on uneven ground and around curves. The ball joint design allows up to 30 degrees of bend.
- Rated for suction or pressure piping systems. A heavy O-ring seal provides a leak proof joint up from 290 to 99 PSI. Sizes 2" through 12".
- Very strong design for long life and durability. Will withstand high heat, pressure, suction, and tensile stresses. Allow use with almost any water, liquid, solid, granular, or pneumatic piping system.

Pacific Pump and Power maintains a complete range of Bauer Pipe and fittings.
All ready for immediate dispatch, backed by technical expertise and reliable
24-hour service.
