

Rehabilitating Sewers on Ala Moana

Insituform Technologies is rehabilitating the sewer line under Ala Moana Blvd. by installing 24" cured-in-place pipes. Insituform is a public company that has been in the sewer business for 40 years. They have a local crew who has installed CIPP all over the Hawaiian Islands for 27 years. Insituform has done many high profile projects such as the Makapu'u Rehabilitation in Kailua and the Kalaniana'ole Highway Sewer Rehabilitation in Hawaii Kai.

During the installation of the CIPP, the sewer needs to be free of debris, cleaned and inspected with cameras. On this project, Insituform has sub-contracted Frank Coluccio Construction Corporation to use their Godwin Dri-Prime Pumps to bypass a sewer line through temporary piping. Pacific Pump and Power is assisting Insituform with their CIPP by providing pumps to do water inversion. Water inversion is a process used when installing large diameter CIPP in order to inflate the fiberglass sock to ensure a snug fit against the edge of the pipe.

For this project, Insituform is renting one 4" CD103M Godwin Critically Silenced Dri-Prime Pump and one 4" CD100M Godwin Critically Silenced Dri-Prime Pump.
