

Jetting Storm Drains Along Nimitz!

In December Pacific Pump and Power worked with Robinson Construction to clean out 5 storm drains ranging in sizes from 8" to 24" along Nimitz highway. Robinson rented our trailer mounted Sewer Equipment Co 747-FR2000 Jetter with an operator to clean the lines. This unit produces 2000 psi at 60 gpm and has 500' of hose. With the integrated hydraulic reel that is powered by the same Cummins Diesel that runs the pump this unit is the right tool to get the job done right and efficiently. Call or email us if you are interested in more information on this equipment.

Since Pacific Pump and Power opened its doors over 5 years ago; in spite of the high cost of business in Hawaii, we have honored mainland sales and rental rates on all the equipment we carry. This is one of the ways we make sure that we are the best and easiest solution to all your fluid transfer needs. As of January first 2012 our suppliers have increased their pricing across the mainland. Because we honor mainland rates this means that both our rental and sales pricing have increased as well.

Not all of our prices have gone up. A lot of our prices have remained unchanged but the ones that have increased have gone up between 3%-4%.
