Mighty Automatic Dredge

Pacific Pump and Power has a Canadian sister company called Canada Pump and Power. Canada Pump and Power has used years of experience in the dredging industry to develop the Mighty Automatic Dredges. The Mighty Auto Dredges are superior systems that enable dredging year round in almost any environment. Due to the Mighty Auto Dredge's relatively compact design the assembly, disassembly and shipping has never been so fast, easy and cost effective. The dredge moves around the pond itself without requiring an operator. If it encounters a problem, it will automatically stop and give us a phone call. The Mighty Auto Dredge control system uses a unique patented feedback loop that optimizes any dredging job.

Features

- Will soon be available to work with all sizes of the Flygt 5000 series sludge pumps.
- Depending on dredging requirements a variety of cutter heads and pump sizes are available
- Capable of handling and maintaining operation in environments that are not safe for continuous human operation
- Smart phone alerts for maintenance and system checks
- No continuous on site personnel required creating a safer work environment
- System automatically adjusts location, pump parameters and winch parameters to optimize dredging. Manual operation is also available.
- System assembly, disassembly and shipping are easy and low cost
- Three dimensional dredging with depth control and pond floor mapping
- A variety of dredge patterns available according to the application required
- Redundant electrical and mechanical safety systems in place
- The automatic control system minimize personnel, costs and environmental impact
- Each component is built to easily integrate with all other auto dredge components
- Winch motors are direct drive to increase efficiency while maximizing power output. Each drum is steel fabricated and sized according to ASME B30.7.2006.
