## Large Diameter Electrofusion

HDPE pipe is without question, the most durable and reliable piping choice in the industry. Part of this reliability is that it is connected with fusion welds that are stronger than the actual piping, making it a leak free system. There are times when getting butt-fusion equipment on the end of a pipe too restrictive but, there is an excellent fusible solution for those situations, which is Electro-fusion.

Pacific Pump & Power has the most qualified personnel in Hawaii for electro-fusion. We are certified in Levels 1,2, & 3 so we can fuse any size of Electrofusion couplers. We also have the equipment available in our rental fleet to do so. We just took care of a few connections for a client the other day on some 20" HDPE, have another project coming up right away on some 28" HDPE, and have experience in Hawaii doing even larger diameter than that!

If you need assistance with HDPE or PVC pipe fusion, dewatering, generators, compressed air, dredging, pumps, pipe plugs, service or operations, please call us at 808-672-8198 or email us at [Sales@hawaii-pumps.com](mailto:Sales@hawaii-pumps.com). If there is something specific you want us to stock let us know!
