

Flash Floods in Hawaii's Rainy Season

In the early morning hours of December 11, a flash flood hit the North-South Road Construction Site in Kapolei, Oahu. 3-5 inches of rain fell within 3 hours, submerging the westbound lanes of the H1 bypass. The State Department of Transportation contacted Kiewit Pacific for assistance who responded with two Godwin Dri-Prime Diesel Pumps, a 6" CD150M and 4" CD100M.

The combined capacity of 2450 gpm helped take control of the flooding and restored safe traffic flow.

After 12 hours, the flood waters were drawn down completely and the pumps maintained on standby to respond again. "The pumps were readily available and completed the job without any problems," says Kiewit Pacific's, Chris Quitevis.

Flash floods can be as dangerous as they are unpredictable. Every year, flash floods claim properties and human lives. Be prepared and take flash flood warnings seriously. Oahu appeared to bear the brunt of this storm with reports of flooded homes, flooded roads, rockslides, and power out to nearly 14,000 residents.
