

HAPPY HOLIDAYS!!!

Dewatering at KMCB

Jayar Construction is working with Korte Company on a project moving and upgrading an existing lift station for a new lodging facility in Kaneohe at the Marine Corps Base. Pacific Pump and Power was able to provide dewatering equipment, first with a 6" CD150M Godwin Dri-Prime Pump capable of 2.4 million gallons per day. Since the project is close to the shore, it is hard to predict the exact flow requirements from the ocean, so a 12" DPC300 Godwin Dri-Prime Pump was added to the site later on to handle the requirements. Together these two pumps were capable of 9.6 million gallons per day! That was sufficient to keep the hole dry until the concrete casting was set inside.

Later on during the project while installing pipe, another pump was needed to dewater a hole, 6' below sea level. Pacific Pump and Power brought in the 12" DPC300 Godwin Dri-Prime Pump which got the job done and kept the construction moving along. Pacific Pump and Power currently has nine 12" DPC300 Pumps in their fleet on Oahu and with the support of Godwin Pumps, have the ability to bring in more or different pumps if required.

Godwin Pumps recently released a new Dri-Prime Pump, the CD500M. This pump is capable of flows up to 19.3 million gallons per day and up to 200' of total dynamic head! With 24" suction and 18" discharge connections, this pump can suit your biggest jobs!
