BYPASSING ON MAUI

Entoconn of Hawaii did a sewer bypass in Kahului, Maui on October 24-26, 2009 with two 8" CD225M Critically Silenced Dri-Prime Godwin Pumps for the Maui Mall. Together these pumps are capable of 6200 gpm. Entoconn had to locate a line in the ground and connect it to a new line. This project took months to plan but had a very efficient execution thanks to the Godwin Dri-Prime Pumps, Road Ramps, Cherne Pipe Plugs, and Suction and Discharge equipment provided. Pacific Pump and Power had a mechanic and an operator on site for the duration of the project to help with the set-up, run the bypass and ensure that everything went smoothly.
