

## 84" Sewer Bypass at Hoakalei

Delta Construction had to dig under the Honouliuli Wastewater Treatment Plant's 84" discharge line. At times, the flow in this line exceeds to about 26 million gallons per day! For safety and spill prevention, Delta Construction set-up a bypass so that in the event of the pipe collapsing the bypass could be turned on so that the wastewater treatment plant would have no impediments to their operations.

This bypass required the use of eight big pumps! Four 12" Electric DPC300 Godwin Dri-Prime pumps, two 12" Diesel DPC300 Critically Silenced Dri-Prime pumps, and two of Delta's own 8" Electric CD225M Godwin Dri-Prime pumps.

The discharge of these pumps went through over 6000' of high density polyethylene piping to a downstream manhole. Delta also rented two high pressure 84" pipe plugs capable of holding back 125 psi. These pipe plugs were custom built for this project and are now a part of Pacific Pump and Power's rental fleet!

## Pump Training Course #225 was a SUCCESS!!!

Pacific Pump and Power would like to thank all of this year's attendees at the #225 Basic Hydraulics and Portable Pump System Design Training Course for making this our best year with 70 students over four days on Oahu, Maui and Kauai! We look forward to seeing you back next year for more pump education.
