

Moving Poop in Kahala!!!

Pacific Pump and Power is running a sewer bypass for Michels Pipe Services so they can install Cured In Place Pipe (CIPP) in the existing 24" sewer line along Kahala Ave. CIPP is a process where a polyester felt liner is impregnated with polyester resin and inverted into a pipeline using either air or water. The liner is then heated for several hours which turn the liner into a solid pipe within a pipe! This rehabilitation work prevents groundwater intrusion into the sewer system and prevents sewer lines from collapsing. Michels has worked on numerous jobs lining major sewer lines throughout the Hawaiian Islands.

Pacific Pump and Power is providing Michels turnkey bypassing for this project along with operators on duty 24hr/day while the bypass runs. This bypass uses approximately 2,000 feet of 8" Bauer Quick-Disconnect steel galvanized piping with (2) 6" CD150M Critically Silenced pumps. The Critically Silenced pumps adhere to the 68db noise restriction in place while working on residential areas.

Michels is using 8" Road Ramps for all their road crossings.
