

## New Distributor for Stancor Pumps!!!

Pacific Pump and Power is now the exclusive distributor of Stancor's Stainless Steel Avenger Series Pumps! In Hawaii pumps corrode very quickly in the salt and abrasive coral. Pacific Pump and Power spent two years searching and testing for a line of submersible electric pumps that are suited to our environment. Stancor Pumps is the solution!

Our qualified clients can get a FREE ONE WEEK TRIAL of a Center Line Series Stancor Pump. Stop by to pick one up!

Pacific Pump and Power has put this line of pumps through extensive testing. The testing included putting a 2" SSS-100 pump through a 24 hour/day, 30 day test in a salt water test tank. The pump continuously circulated 10 gallons of sand and coral mixed into a slurry and at the end of the test there were no signs of wear! Both internally and externally the pump looked brand new!

Most of the submersible pumps for this type of application are made from a combination of stainless steel with materials such as plastic, aluminum or cast iron. This contrast in materials cause the pumps to break down. Stancor's Avenger Line of pumps is made entirely of Stainless Steel. These pumps are complete with double silicon carbide mechanical seals and viton elastomers.

This stainless steel line ranges from 0.75 HP to 7.5 HP and has two different styles. The Center Line Series has a 2" discharge connection and Water Line Series has a 2"-4" discharge connection.
