

Dewatering by the Ocean!!!

On this project Kiewit needed to dewater a large pit so that they could pour a concrete slab below sea level. Unlike our typical dewatering jobs this one had two water entry points through the ground and waves crashing over the sand bags!

Kiewit Pacific is dewatering 10' from the ocean just outside of Lahaina on Maui. The Lahaina Watershed project is needed to provide flood protection to residential and commercial lands in the southern part of the town of Lahaina and to reduce the amount of sediment entering near shore waters. Kiewit is installing large storm water culverts under the Honoapiilani highway. This is to allow the flow of water from Mauka out to Makai.

In order to keep up with the in-flow of water, Kiewit rented an 8" CD225M Critically Silenced Dri-Prime pump capable of up to 3200 gpm! The dewatering was run through piping which went under the highway to a dewatering pit Kiewit built.

To ensure reliability, Kiewit has a back-up pump standing by.

HWEA Conference 2010

Thank you to all who stopped by to visit our booth at the Hawaii Water Environment Association Conference held at the Neal Blaisdell Center's Exhibition Hall on March 16 & 17, 2010. There was a great turnout of visitors and vendors and we appreciate the inquiries received regarding our services.

Call today at 672-8198 or visit us at Campbell Industrial: 91-503 Nukuawa Street, Kapolei
