

Rehabilitating Sewers in Kalihi

Ideal Construction completed a difficult sewer rehabilitation project in Kalihi, with the help of (2) Pacific Pump and Power 8" CD225M CS pumps that processed up to as high as 3500 gallons per minute, about 1.8 Million gallons per day. This project was especially difficult due to a majority of the open trench excavation that was done in parkade areas with less than 6' of clearance. Ideal Construction did majority of the excavation and placement of the pipes with a rubber tired backhoe with the roof removed and a modified exhaust. Pneumatic tools were used by hand for the extremely tough parts.

With Pacific Pump and Powers highly trained pump operators manning the pumps any time pumping was required helped move things along on a timely matter. Ideal Construction and Pacific Pump and Power working hand in hand making what seemed to be very difficult sewer rehabilitation in Kalihi a great success.
