Gasoline Irrigation Pump

PVT Land is a construction landfill located on the dry west side of Oahu in Maile. They had Pacific Pump & Power assist them in creating an inexpensive self contained irrigation system to start the growth of grass on about five acres of dry land in multiple phases. Their system included four zones consisting of about 140 sprinkler heads each. Each zone covers about 16,000 sq ft and with battery operated valves they are able to automate the whole system so that it only requires a daily visit by someone to fuel the pump. If you look at the picture below you can clearly see which parts of the land has been irrigated and which parts are a part of the next phase of irrigation. Two important elements in this system that are apparent in the picture below on the left are the use of a larger external fuel tank to extend the pumps run time and the pressure relief valve so that if the valves malfunction and everything is shut off the pump does not dead head and cause damage the pressure is released through the relief valve.

McELROY
UNIVERSITYSM

Pacific Pump and Power strives to support the high density poly ethylene fusion industry in the Hawaiian Islands and Guam as much as possible so in addition to stocking machines both for purchase and rent at our Oahu yard, we are also stocking a wide range of the most common wear parts for the McElroy HDPE Fusion machines in Hawaiian Islands and Guam.

Additionally we have teamed up with McElroy University to certify a local factory certified operator trainer and have sent our mechanics to the factory for McElroy technician training. If you would like to hire certified operators or would like us to hold a operator course to train your guys, let us know, we will be happy to schedule a course to be held at our office or your location.

Call today at 672-8198 or visit us at Campbell Industrial: 91-503 Nukuawa Street, Kapolei
