Mira Image Construction bypassed a large sewer line in Hawaii Kai while it was rehabilitated utilizing Cured in Place Pipe technology.

To ensure no leaks in their discharge piping system, Mira hired a certified fusion technician from PPP to fuse about 4000' of 12" HDPE piping with our McElroy T500II track fusion machine. With a data logger the joints were all logged to ensure that the welds were all perfect and the system was a continuous leak free line.

In order to divert the flow of the sewer system Mira pumped with two 8" CD225M Critically Silenced Godwin Pump and two 4" CD100M Critically Silenced Godwin Pumps. These pump managed the flows with ease and with 100% redundancy on the pumps there was no concern for a spill.

Another successful bypass with Mira Image!!!
