Pond Cleaning On the Big Island!

The Kona coast has brackish ponds called “loko wai” close to the ocean. Over time these ponds tend to get filled up with sand, weeds, and other material. Some of this material comes from tsunami’s washing material into them; other material comes from organic growth. In both cases, in order to maintain the ecosystem in these ponds, they sometimes need to be cleaned out. Some resorts that have the responsibility of maintaining these ponds use Godwin Dri-Prime pumps. They use the Godwin pump like a vacuum cleaner to suck up the silt and organics from the bottom of the pond and dispose of it into geotextile bags.

Although these pumps are not specifically designed to deal with the heavy abrasion and salt water, they hold up very well to these extremely harsh conditions. Multiple maintenance crews on the Kona coast have found this to be the best way to deal with this type of maintenance. Pacific Pump & Power has not only sold the pumps to these maintenance crews, but also the geotextile bags that they are pumping into.

If there is anything we can do to help you with your equipment, big or small, do not hesitate to call 808-672-8198 **anytime** or email us at Sales@HawaiiPumps.com.

Call today at 672-8198 or visit us at Campbell Industrial: 91-503 Nukuawa Street, Kapolei
