Diesel and Electric Dri-Prime Pumps

When many people think of temporary pumps, they think diesel powered pumps. This is a very efficient way to operate because the diesel engine is connected directly to the motor, which wastes less energy than other methods.

There is a time and a place for everything! Pacific Pump & Power also has electric Dri-Prime pumps in our rental fleet. These have the same pump ends as our diesel units but powered by 3 phase, 230/460 volt, electric motors. These pumps are used in applications where power is available so it is more cost effective to use electricity rather than diesel to run the pump.

We have a job going on in Maui right now with one 6" electric pump as primary, an 8" electric pump as lag and diesel silenced pumps as back up. We also have another job coming up in the next week or so that has 12" electric pumps as primary and diesel silenced pumps as backup.

If you are interested in or need assistance with pumps, power, compressed air, fusion, pipe plugs, service or operations, please call us at 808-672-8198 or email Sales@PacificPumpandPower.com

Check us out on the web at www.PacificPumpandPower.com
