HDPE Fusion on the Water

Pacific Pump & Power was hired to fuse ~10,000' of 8" HDPE for a job in Honolulu last month. We did the job in just 6 days by running two well supported crews and two McElroy certified fusion technicians. The client required datalogs from McElroy DL6 dataloggers to confirm quality assurance and provide records of each joints.

There was certainly some additional challenges to overcome working out on the barges on the water but with a little luck on our side, the job went very smoothly and the client was very happy with our crew and the final product!

If you need assistance with sewer bypasses, compressed air, pumps, power, HDPE fusion, pipe plugs, service or operations, please call us at 808-672-8198 or email us a Sales@hawaiiumps.com.
