PACIFIC PUMP & POWER

Turn Key Bypassing in Maui

The first half of 2020 has been very busy for Pacific Pump & Power with lots of dewatering, HDPE fusion services and rentals and both clean and dirty water bypassing!

In these photos we are featuring a bypass that we recently completed for a contractor over on Maui. To bypass some pretty substantial sewer flows, we used a couple of Godwin 8" CD225M Dri-Prime Critically Silenced pumps and an 8" steel galvanized Bauer pipeline.

With the increase in construction activity in Maui, we are now keeping more equipment in our Kihei yard. We have also purchased a second yard in Wailuku close to Young Brothers which will have full time staff once the yard is set up to be operational later this year!

If you need assistance with sewer bypasses, compressed air, pumps, power, HDPE fusion, pipe plugs, service or operations, please call us at 808-672-8198 or email us at Sales@hawaiiipumps.com
