Fusion Training

At Pacific Pump & Power we pride ourselves on having the best qualified personnel in the industry. Our technicians have factory training on the equipment we repair and, where applicable, on the equipment we use.

Not only is our staff trained in HDPE Fusion, but we also have a level III McElroy certified instructor that can provide the same training as the factory in Tulsa to contractors here locally! This month, West Maui Construction had our instructor fly over to Maui to certify five of their technicians in large diameter butt fusion. They rented our Tracstar 900 with a datalogger to fuse the 34" IPS pipe run they are installing.

This training took the "in the field" description of the class a little more literally than most. We did our classroom time under an old tarp to escape the rain - tied between a dozer and a reach lift - and sat on HDPE pipe stubs, but the training got done and we had fun doing it!

If you need assistance with sewer bypasses, compressed air, pumps, power, HDPE fusion, pipe plugs, service or operations, please call us at 808-672-8198 or email us at Sales@hawaiiipumps.com
