Getting in The Trenches

In the spirit of the New Year, Pacific Pump & Power has hit the ground running! We have a lot of projects starting up including lots of dewatering and sewer bypassing all across the Hawaiian Islands. We have also been doing a lot of HDPE pipe fusion, specifically in-ditch.

For one of the projects that we are a subcontractor on, we are installing 6, 16 and 24 inch HDPE pipe in tight trenches. It is meticulous work but we are doing what we need to in order to get the joints to be at 105% of the strength of the pipe and create a 100% leak free system!

If you need assistance with sewer bypasses, compressed air, pumps, power, HDPE fusion, pipe plugs, service or operations, please call us at 808-672-8198 or email us at Sales@hawaiiumps.com
