Dewatering Maui

With all the rain we have had this year in Hawai'i, there has been a lot of water needing to be relocated! Pacific Pump & Power has been pumping water all over the Aloha State to help resolve some of the flooding issues that have occurred so far in 2021.

These photos are of an 8" Godwin Dri-Prime CD225M Critically Silenced Pump from our Maui fleet draining water from a dam to help the water level get down low enough to prevent it from overrunning the spillway!

If you need assistance with sewer bypasses, compressed air, pumps, power, HDPE fusion, pipe plugs, service or operations, please call us at 808-672-8198 or email us at Sales@hawaiiipumps.com
