## Emergency Bypass

Last month one of our clients called us with an emergency sewer bypass that needed to be put in place to divert a potential sewer emergency. We had a crew promptly show up on site and put in four 8" Godwin CD225M and an 18" HDPE pipeline to bypass damaged pipe. While we bypassed, they removed and replaced the broken section of pipeline. Pacific Pump & Power ran the system around the clock for the duration of their work and in the end, the flows were back to the way they were supposed to!

If you need assistance with sewer bypasses, compressed air, pumps, power, HDPE fusion, pipe plugs, service or operations, please call us at 808-672-8198 or email us at [Sales@hawaiiipumps.com](mailto:Sales@hawaiiipumps.com)
