Pump Station Bypass

A critical pump station on Kauai is experiencing issues. As an interim response, a client has installed a couple of 6” pumps on automatic float controls as backup. Pacific Pump & Power sold one of these pumps to the client, and the other is from our Kauai rental Fleet. Both pumps are fully plumbed into the system. In the event that the permanent station fails, both of the backups will automatically turn on and off based on the level in the wet well.

If you need assistance with sewer bypasses, compressed air, pumps, power, HDPE fusion, pipe plugs, service or operations, please call us at 808-672-8198 or email us at Sales@hawaiiumps.com
