Dewatering By The Ocean!

Pacific Pump & Power recently finished a project dewatering right by the ocean. A General Contractor was installing electrical conduits in a trench.

At some points, the contractor required as much as four 6" CD150s. Each one putting out upwards of 1,600 gpm. This kept the trench dry so they could do their work!

If you need assistance with sewer bypasses, compressed air, pumps, power, HDPE fusion, pipe plugs, service or operations, please call us at 808-672-8198 or email us at Sales@hawaiiumps.com
