## IMS Dredge on Island Ready to Work!

Pacific Pump & Power has always done dredging in the Hawaiian Islands but we are now back to having a unit on the ground in Campbell ready to work! We recently completed a full restoration on an IMS 4010 Auger dredge. This dredge has a 10" dredge pump and is designed to pump through an 8" pipeline.

This Dredge is powered by a Cummins 177hp diesel engine. The slurry pump is rated for 3,000 gpm @ 70ft TDH. The 12,960 in-lb auger head is designed to pull soft material from the bottom of lined or unlined ponds and is capable of passing up to 6" solids! This dredge is set up to move around on a cable system supported by anchors either on shore or under water.

If you need assistance with dredging, generators, compressed air, sewer bypassing, pumps, HDPE fusion, pipe plugs, service or operations, please call us at 808-672-8198 or email us at [Sales@hawaii-pumps.com](mailto:Sales@hawaii-pumps.com)
