Keeping Things Running!

A large waterpark facility had one of their two main filter pumps go out late in the day last week. This pump was critical to keep their water filtration where it needed to be for the park to remain open. Although it was evening time they called Pacific Pump & Power and we coordinated a crew to be there first thing the next morning before the park opened to swap in a temporary electric Godwin CD225M to keep the water moving and keep the water in optimal condition for the patrons.

If you need assistance with emergency pumping, HDPE or PVC pipe fusion, dewatering, generators, compressed air, dredging, pumps, pipe plugs, service or operations, please call us at 808-672-8198 or email us at Sales@hawaiiumps.com.
