PACIFIC PUMP & POWER

Utilizing a High Pressure Pump for Irrigation Watering!

A client needed to figure out a way to provide water at high enough pressure and flow to run their irrigation system to water the banks of this storm retention basin from a hole in the ground in the middle of the basin. We were able to utilize a 4"x3" Godwin HL80M Critically Silenced pump to fill this need. This pump has a Primeguard Control panel built into it so we are able to program the pump to turn on and off automatically as required to sync with the irrigation valves. They decided to use silenced model because it is close to homes and they do not want to disturb the neighbors.

If you need assistance with irrigation pumps, joint testing, HDPE or PVC pipe fusion, dewatering, sewer bypasses, generators, compressed air, dredging, pumps, pipe plugs, service or operations, please call us at 808-672-8198 or email us at Sales@hawaiiipumps.com.
