Little Bypasses on Oahu

This year we have been doing a lot of little bypasses on Oahu for different contractors. When a little bit of piping needs to be changed out or a sewer manhole needs to be tied into, these projects can be as short as just a couple days.

Pacific Pump & Power has done many, many bypasses so these little sewer bypasses that seem very stressful to most people are just a regular Tuesday for us :) For lots of these bypasses, the contractor has our team set up the bypass, pressure test it, and operate it for them for the duration of the project. They can focus on the work they do best and let us take on the part we do best.

If you need assistance with sewer bypassing, joint testing, HDPE or PVC pipe fusion, dewatering, generators, compressed air, dredging, pumps, pipe plugs, service or operations, please call us at 808-672-8198 or email us at Sales@hawaiiumps.com.
